

Elliptic Curves over Finite Fields

Here you can plot the points of an elliptic curve under modular arithmetic (i.e. over \mathbb{F}_p).
Enter curve parameters and press 'Draw!' to get the plot and a tabulation of the point additions on this curve.
Interested in *arbitrary* curves over \mathbb{F}_p ? [Try this site instead.](#)

Note: [Since it depends on multiplicative inverses.](#) EC Point addition will only work for *prime moduli* like 2,3,5,7,11,13,17,19,23,29,31,...,109,... :-)

Draw the elliptic curve $y^2 = x^3 + ax + b \pmod r$, where a : b : r :

Point Detail

Click/tap on a point in (table or plot) to show details about that point.

Table of Point Additions
